SKILLS

Networking

- Switching, Routing, Subnetting
- VLANs, Inter-VLAN Routing
- RIP, OSPF, EIGRP

Cybersecurity & Testing

- Vulnerability Assessment
- Network & Web Application Testing
- Traffic Analysis & Sniffing

Security Tools

- Nmap, Wireshark, Hydra
- Burp Suite, Nessus, Sqlmap

Platforms & Systems

- Kali Linux
- Windows Server
- Red Hat Enterprise Linux

Virtualization & Labs

- VMware, Git & Github
- Cisco Packet Tracer

LANGUAGES

- Bangla (Native)
- English (Fluent)

PROFILE

CCNA-certified Network & Cybersecurity enthusiast with hands-on experience gained through structured home labs and documented portfolio projects. Strong foundation in enterprise networking, vulnerability assessment, and penetration testing using industry-standard tools. Experienced in network design, routing protocols, Linux-based security tooling, and lab-driven problem solving. Actively seeking an entry-level Network or Security role to apply practical skills and grow within a professional environment.

PROJECTS & LAB EXPERIENCE

(Detailed documentation available at rezv.me)

Home Lab Penetration Testing

Environment: Kali Linux, Metasploitable 2, Windows VM

- Conducted controlled brute-force authentication testing using Hydra.
- Performed vulnerability scanning, service enumeration, and traffic analysis using Nmap, Nessus, and Wireshark.
- Demonstrated credential interception through network sniffing with Ettercap.

Enterprise Network Design & Simulation

Tool: Cisco Packet Tracer

- Designed and simulated a small enterprise network using routers, switches, and end devices.
- Configured VLANs, trunking, inter-VLAN routing, and routing protocols (RIP, OSPF).
- Implemented subnetting strategies and structured IP addressing schemes.
- Validated connectivity and performance through testing and troubleshooting scenarios.

Local AI Model Deployment & Testing

Environment: Personal AI Home Lab

- Deployed and tested open-source LLMs (e.g., LLaMA 3) locally using Ollama and LM Studio.
- Optimized RAM and GPU usage for stable model execution.
- Troubleshot model loading issues, configuration errors, and incomplete downloads.
- Explored AI tooling for research and automation use cases.

Windows and Linux Server

Environment: Windows Server & RHEL

- Installed and configured Windows Server with Active Directory, user/group management, and Group Policy Objects (GPOs) for access control simulation.
- Set up and administered a RHEL environment including package management with dnf, service control with systemctl, and SSH hardening.
- Configured firewall rules using firewalld on RHEL and Windows Defender Firewall to restrict unauthorized access between lab machines.
- Practiced privilege escalation awareness and log monitoring by reviewing Windows Event Logs and Linux /var/log entries for suspicious activity.

SOFT SKILLS

- Problem Solving
- Self directed learning
- Doccumentation
- Team Collaboration

CTF & Practice Platform

- **Tryhackme**
- Overthewire (Bandit)

PERSONAL INTERESTS

- Open Source Security Research
- Home Lab Experimentation & Network Simulation
- AI & Large Language Model Exploration
- Indoor Gardening
- Strategy & Puzzle-based Gaming

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science & Engineering
School of Engineering & Physical Sciences
North South University | Incomplete

Diploma In Certified Ethical Hacking
Creative IT Institute | 2024-2025

Cisco Certified Network Associate
Cisco ID: CSCO15000094
Status: Active | Valid till 11/2028

Pre Security - Tryhackme
THM ID: THM-25OO8L1NGV
Status: Active

Cybersecurity Security 101 - Tryhackme
THM ID: THM-Y4MOAUZVGD
Status: Active

Jr. Penetration Tester
Status: In Progress

SOC Level 1
Status: In Progress

AI Security
Status: In Progress

PROTFOLIO HIGHLIGHTS

(Detailed documentation available at rezv.me)

- OTW Bandit writeup — 13+ levels documented with methodology
- bWAPP Lab — web app vulnerability testing report
- Home Lab VAPT Report — full vulnerability assessment writeup
- Enterprise Network Design — Cisco Packet Tracer simulation report
- Secure WAN Connectivity — Cisco Packet Tracer simulation report
