SKILLS

- Networking** - Switching, Subnetting, Routing
- Security Tools** - Nmap, Wireshark, Hydra, Burp Suite
- Platforms** - Kali Linux, Red Hat Enterprise, Windows Server
- Concepts** - Vulnerability Assessment, Basic Pentest, Sniffing, DDOS, Metasploitable 2
- Others** - VMware, Git, Cisco Packet Tracer

LANGUAGES

- Bangla (Native)
- English (Fluent)

PROFILE

Motivated and self-taught network and cybersecurity enthusiast with a CCNA certification and hands-on experience in vulnerability scanning, penetration testing, and ethical hacking tools. Passionate about offensive security, learning continuously, and looking for an opportunity to grow in a professional InfoSec role.

PROJECTS & EXPERIENCES

Home Lab Pentesting

Metasploitable 2 & Windows VM

- Performed Brute force attacks using hydra
- Scanned enumerated vulnerabilities using Nmap, Nessus, Wireshark and Accunetix
- Captured HTTP credentials via sniffing with Ettercap

Networking

Network Design & Simulation using Cisco Packet Tracer

- Designed and simulated a small enterprise network using routers, switches, and end devices.
- Configured VLANs, trunking, inter-VLAN routing, static and dynamic routing (RIP, OSPF).
- Applied subnetting techniques and implemented IP addressing schemes.

Local AI Model Deployment & Testing

AI deployment on local pc for research

- Deployed and tested open-source LLMs (e.g., LLaMA 3) on a personal PC environment using Ollama, LM Studio, and other tools.
- Managed system resource optimization (RAM/GPU usage) for smooth model execution.
- Troubleshoot model loading issues and handled incomplete downloads, config errors, etc.

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science & Engineering

PRESENT

School of Engineering & Physical sciences

North South University

Diploma In Certified Ethical Hacking

2024-2025

Creative IT institute

Passed

Cisco Certified Network Associate

11/2025

Cisco ID: CSC015000094

Status: Active
